SUMMARY

Mid-senior level software engineer with a strong focus on React, TypeScript, and Node.js. I spend most of my free time building side projects, exploring new frameworks, and refining my skills. Experienced in backend development using NestJS, PostgreSQL, TypeORM, and MongoDB. Passionate about writing clean, maintainable code and building products that feel good to use.

EXPERIENCE

Software Engineer

Citytech **August 2024 - Present, Kathmandu, Nepal**

· Contributed to feature development and system enhancements for City Express Money Transfer, a major remittance platform used across Nepal and internationally.
· Added new capabilities on top of existing backend infrastructure, improving how users send and receive money via cash pickup, bank deposit, and digital wallets.
· Worked on high-traffic systems supporting remittance from over 100 countries and disbursing through 7,500+ locations across Nepal.

Mid-level Front-end Engineer

Kwant (New York) **January 2023 - July 2024, Remote**

· Improved user experience for a construction workforce management platform by implementing responsive React components.
· Contributed to the Kwant UI library by building reusable React components.
· Migrated existing legacy Angular project to React (Typescript).
· Fixed production bugs in the legacy Angular application.

Part-time Backend Freelance Developer

Freelancer **May 2023 - August 2023**

· Developed and maintained backend services using Node.js, ensuring seamless integration with front-end applications.
· Implemented RESTful APIs to support web and mobile applications, enhancing data access and security.
· Utilized NPM, Docker, and NGINX for efficient development, deployment, and server management.
· Worked with cloud computing platforms like AWS to deploy scalable and reliable backend solutions.

React developer

Lanceme Up **May 2022 - January 2023, Kathmandu, Nepal**

· Led the development of a Jira-like SaaS product.
· Designed and implemented user-friendly chat functionalities and a secure, in-house Google Drive alternative for the SaaS platform, improving team collaboration and document management.
· Managed the team as a front-end lead.

SKILLS

Front End: React, Typescript, React Native (Expo), Javascript, Tanstack Query, Redux, RTK Query, Styled-components, CSS, Tailwind, HTML, Recharts, Jest, Ant Design, Shadcn

Back End: Node JS, Express, Nest JS, PostgreSQL, TypeORM, MongoDB, SQL

Other tools and services that I use: Git, Figma, AWS S3, EC2, Docker, Supabase

EDUCATION

Bachelor of Computer Applications

Minor in Computer Science · Nepal College of Information Technology · Kathmandu, Nepal · 2026

· Awarded full-scholarship for 4 years due to grades

CERTIFICATIONS

Frontend Developer (React) Certificate

HackerRank

· Certified front-end (React) developer that demonstrates my excellent understanding of the React framework
